ABOUT ME

Hi! I am Dariusz Knysak, a web developer focused on creating great services and websites. Designing and Coding have been my passion since the days I started working with computers but I found myself into web design/development since 2018. I enjoy creating from scratch both back-end and front-end parts of apps. For over 2 years, I have worked hard to learn basics of programming in Java, JavaScript from books, videos and courses. Also for a few months I was learning under the guidance of an experienced mentor. Since then I have created a lot of projects for myself and as a team member.

COURSES

2019 - now

CodersCrew

Front end Developer Course - CodersCamp

2018 - 2019
